Tübingen, June 19th 2018

Yesterday, when the CE mark for the Unity was announced, the team at Radiation Oncology University of Tübingen has taken the first images.

The installation in Tübingen is the first commercially available Unity system in the world. The program of MR-guided Radiation Oncology is funded by the German Research Council (DFG), the Medical Faculty and the University Hospital Tübingen.

The team in Tübingen will start to image the first patients today and expect the first treatments within the next few weeks.
