The University Medical Center Tübingen is part of the University of Excellence Tübingen. It provides medical services at the highest level and covers the entire spectrum of modern medicine, research, teaching and clinical care.

The Faculty of Medicine at the University of Tübingen invites applications for a position at its Institute for Health Science within the Section of Population Based Medicine and at the Health Campus Tübingen-Esslingen as a

**Full Professor (W3) of Health Behaviour, Prevention and Management (f/m/d)** available immediately.

The successful candidate should represent the research area in the full range of the aspects prevention research, clinical research and health management in research and teaching with special emphasis on behavioural aspects of health. Possible research foci include high-prevalence behavioural problems in population medicine, e.g. stress-related disorders, overweight and obesity as well as digital innovations in (trans-sectoral) patient care, especially in the field of mental health.

A degree in human medicine or health sciences with relevant management experience is required. Additional qualifications, e.g. in health management/health economics, are of advantage. In particular, the applicant should have gained experience in an international context (with regard to the thematic orientation of the chair), e.g. through academic stays abroad and international cooperations. Evidence of scientific excellence must be proven through publications and the acquisition of competitive third-party funding.

The professorship is associated with the leadership of the interprofessional, international M.Sc. degree programme Population Based Medicine & Health Care Leadership. Applicants are invited to outline an innovative teaching concept for the degree programme from an interdisciplinary, interprofessional and international standpoint. The degree programme also addresses mid-career professionals and aims to train competent developers for healthcare organisations. The teaching concept should therefore place particular emphasis on the development of (practical) leadership skills for (future) managers in the health care system. Required qualifications include a PhD or equivalent international degree and postdoctoral qualifications equivalent to the requirements for tenure. This includes evidence of teaching effectiveness. Ideally, the successful candidate will also cooperate closely with the other degree programmes at the Health Campus Tübingen-Esslingen and will be actively involved in the newly established Centre for Mental Health (ZPG) Tübingen.

The University of Tübingen is particularly interested in increasing the share of women in research and teaching and therefore strongly encourages women candidates to apply. In line with its internationalization agenda, the university welcomes applications from researchers outside Germany.

Applications from equally qualified candidates with disabilities will be given preference.

The German-language advertisement is the sole legally binding advertisement of this position.
Please submit your entire application using the web-based application platform https://berufungsportal.medizin.uni-tuebingen.de. The deadline for applications is October 17th, 2019.

Enquiries may be directed to the Dean.

Dean of the Faculty of Medicine
