

This third issue shows all **102 iFIT-related publications** from **June 2021** to **July 2022**.

The list is sorted by iFIT research area and last name of first author.

iFIT partners are marked in bold, titles in red. The list is accompanied by **statistics on impact factors** and **number of publications per area**.

Publications with the highest IF (>15) are highlighted .

● Area A | **FIMT** – **Functionally Instructed Molecular Therapies**

Formalities

Disclosure note

The iFIT research is translational, both preclinical and clinical but also across disciplines. The **Covid pandemic** made clear that **mRNA vaccination**, which was originally developed for tumor vaccination, paved the way out of this world-wide problematic situation. Moreover, current iFIT research toward **peptide tumor vaccination** has been translated by iFIT researchers and contributes to a **clinical trial of Covid vaccinations** specifically for **cancer patients** with a **suppressed immune system**.

Mandatory Requirements for iFIT Publications

Regardless of the language of the publication and according to the **DFG's requirements**, it is mandatory to use the exact provided wording for the **affiliation and acknowledgment**. The DFG searches for publications solely with the help of these phrases. Therefore, if the wording is not respected, the publication will not be found and will not count for the Cluster's achievements.

GERMAN acknowledgement

Gefördert durch die Deutsche Forschungsgemeinschaft (DFG) im Rahmen der Exzellenzstrategie des Bundes und der Länder - EXC 2180 - 390900677

ENGLISH acknowledgement

Funded by the Deutsche Forschungsgemeinschaft (DFG, German Research Foundation) under Germany's Excellence Strategy - EXC 2180 - 390900677

iFIT AFFILIATION

Cluster of Excellence iFIT (EXC 2180) "Image-Guided and Functionally Instructed Tumor Therapies", University of Tuebingen, Germany

Collection & Sorting of Data

Publications included into this list were collected by requesting a regular update on most recent publication from all iFIT Principal Investigators and Associate Investigators. Moreover, the iFIT office is regularly searching at the PubMed (<https://pubmed.ncbi.nlm.nih.gov/>) for all papers with an "iFIT" or "EXC 2180" acknowledgement. This implies that only papers with the iFIT acknowledgement and/or affiliation can be considered.

Papers are associated to an iFIT area according to the area of the iFIT PIs/AIs shown as authors and marked in bold - regardless of their position in the list of authors. Each iFIT PI/AI is associated with (at least) one iFIT area:

A | FIMT - Functionally Instructed Molecular Therapies

B | ImmT - Immunotherapy

C | MFMI - Molecular and Functional Multiparametric Imaging
