The Faculty of Medicine at the University of Tübingen invites applications for a position at the Center for Women’s Health as a

W1 assistant professor of Molecular Gynaecology

available immediately. In accordance with LGH § 51 (7) the assistant professor shall be employed for an initial four-year period and may be extended for a further two years following a positive interim evaluation.

The successful candidate is expected to represent the subject in research, teaching, and clinical practice. The position has a teaching load of four hours per week prior to interim evaluation and six hours thereafter.

Central tasks of this assistant professorship are the reinforcing of the core areas – minimally invasive concepts, medical technologies, and early diagnosis and prevention with particular attention to their application in the field of women’s health. The successful candidate is expected to contribute to translation and bridge-building of the core competences in the areas of medical technologies and regenerative medicine at the research institute for women’s health. Active participation in the University degree program in Medicine, in Medical Technologies, and in Biomedical Technologies, is also expected. Active collaboration in existing and planned research networks at the University of Tübingen’s Faculty of Medicine is required.

Required qualifications include

• a degree in Medicine and having commenced advanced training as a specialist for gynaecology
  and obstetrics
• an above-average doctoral degree
• Publications in international journals

The successful candidate’s core research areas will be in the areas of investigating the intracellular-molecular effects and clinical applications of physical low-temperature plasma, the characterisation of various medical plasma sources and the non-invasive treatment of intraepithelial neoplasia of the gynaecological membranes.

This position provides the opportunity and expectation that, in the course of the six years of the contract, the W1 assistant professor will attain the research and teaching achievements that will qualify him or her for a subsequent appointment as a tenured professor at a university or equivalent institution. Detailed information on the criteria for the interim and final evaluations may be found in our guidelines for review under the following link: https://www.medizin.uni-tuebingen.de/de/medizinische-fakultaet/struktur-und-berufung

Applicants must be in an early stage of their career; those who have completed a habilitation will therefore be excluded.

The University of Tübingen is particularly interested in increasing the share of women in research and teaching and therefore strongly encourages women candidates to apply. In line with its internationalization agenda, the university welcomes applications from researchers outside Germany. Applications from equally qualified candidates with disabilities will be given preference.
You can find further information on required documentation in our application guidelines at https://www.medizin.uni-tuebingen.de/de/medizinische-fakultaet/struktur-und-berufung. The German-language advertisement is the sole legally binding advertisement of this position.

Please send your entire application (with application form) as a single, electronic PDF file to: berufungen.dekanat@med.uni-tuebingen.de. The deadline for applications is March 7th, 2019.

Enquiries may be directed to the Dean.
