

Suggested Wording

Declaration of Own Contribution to the Dissertation

In the declaration of your own contribution, you must clearly set out what your personal research question and contribution consisted of, and which contributions, if any, were made by others (e.g. which data sets were shared; whether you used data generated and processed by others, etc.).

If you have used AI tools as aids, you must state which tools you used, for what purpose, and to what extent.

If publications have resulted from the dissertation, you must list them here and specify your contribution to each publication and the contributions made by co-authors.

Example:

The study was carried out at the clinic / institute [Name] under the supervision of [Name of habilitated supervisor].

The study was designed by / in collaboration with [Name, position] and [Name, position].

The / All experiments were carried out by me (following training by laboratory members [names]) (independently / in collaboration with / with support from [Name]). (Method xy was performed by [Name].) The [animal experiments] were performed by [Name].

The statistical analysis was carried out by me independently / following consultation with the Institute of Biometry / under the guidance of [Name].

Examples of additional statements if you have used AI tools:

ChatGPT version X was used to generate the codes [...].

Figures [2 and 5] were created using software X.

Software X was used to check spelling and grammar.

I confirm that I carefully reviewed and edited the output of the AI tools [...] before incorporating [texts, code, ...] into the manuscript.

I confirm that I wrote the manuscript independently (under the supervision of [Name]) and did not use any sources other than those I have acknowledged.

(additional details, if applicable)
