

HEALTH RESEARCH STUDY

Helping us understand malaria.
Helping **our community** stay healthy.

*Your health.
Your community.*

Researchers from **Charité Berlin**, the **Bernhard Nocht Institute for Tropical Medicine** and the **Institute of Tropical Medicine in Tübingen** are conducting a study on malaria infections that may remain in the body without symptoms.

We invite **migrants from malaria-endemic countries** and people who **travel to visit family and friends** in their home countries to take part in this important study.

PARTICIPATION INCLUDES

A questionnaire

A simple blood test

Confidentiality and
Voluntary
participation

WHO CAN PARTICIPATE?

Adults and
Children (≥ 5 years)

People with a migration
background from a
malaria-endemic region

Individuals who have
visited a malaria-endemic
country within the **last 15
years**

WHY THIS STUDY MATTERS

This research will help
improve understanding of
malaria and support better
health services for
internationals in Germany.

COMPENSATION
Participants receive
compensation for their time

STUDY LOCATIONS

Berlin - Hamburg - Tübingen
