**3rd International
Tübingen-Symposium
on Pediatric Solid Tumors
in combination with the CWS
study committee meeting**

First announcement

**November 5th-7th, 2009
Tübingen, Germany**

**Local control in childhood
soft tissue sarcoma**

Dear Colleagues,

During the past, advances in treatment and outcome of children suffering from soft tissue sarcoma have been made by European and American multicenter trials. Besides systemic therapy, local control is an essential topic for the outcome and survival of these children. The effects of different modalities of radiotherapy and the role of different surgical procedures remain unclear. Therefore, we would like to invite you in cooperation with the Cooperative Soft Tissue Sarcoma Study to Tübingen in 2009 to discuss advances in local control of childhood sarcoma. International experts from the fields of pediatric oncology, pediatric surgery and radiooncologists will be together discussing actual topics of local control in childhood sarcoma. Abstracts may be submitted for all scientific sessions. Authors are also encouraged to submit clinical case presentations. Tübingen is known to be a comprehensive center for medical care, research and teaching.

We are looking forward having you here in Tübingen.

Jörg Fuchs
Professor of
Pediatric Surgery

Ewa Koscielniak
Professor of
Pediatric Oncology

Thomas Klingebiel

Pediatric Oncology

Preliminary program

Thursday November 5th, 2009

10-17h
CWS study committee meeting (closed)

19h
Welcome reception

Friday November 6th, 2009

Scientific session I:
Pathology / Clinical trials

Scientific session II:
Clinical trials

Scientific session III:
Radiotherapy

Scientific session IV:
Surgery

19h
Gala dinner

Saturday November 7th, 2009

Scientific session V:
Basic research

Scientific session VI:
Problem cases
